3RD EDITION

Routledge Handbook of Public Communication of Science and Technology

Edited by **Massimiano Bucchi**, University of Trento, Italy
and **Brian Trench**, Dublin City University, Ireland

Series: Routledge International Handbooks

The third edition of the *Handbook* brings the reviews up-to-date and deepens the analysis. As well as substantial reworking of many chapters, it includes four new chapters addressing enduring themes (science publics, science-media theories), recent trends (art-science interactions) and new proposed insights on science communication as culture and as "the social conversation around science".

Combining the perspectives of different disciplines and of different geographical and cultural contexts, this original text provides an interdisciplinary as well as global approach to public communication of science and technology.
