EPRI Report Number: 3002017150
JSPS 123 Committee Report: Vol. 60 (2019) No. 3

The conference co-chairmen are indebted to the conference secretariat, Elizabeth Benton (EPRI), who managed the abstracts, manuscript, and overall conference program and had the task of being the intermediary between EPRI and 123HiMAT. Prof. Kobayashi (Tokyo Institute of Technology) is also acknowledged for his role in working with EPRI and all the in-country arrangements with various partners. Financial support from EPRI's Fossil Materials and Repair Program (managed by Dr. John Siefert), the JSPS, 123rd Committee industrial members, and the city of Nagasaki is greatly acknowledged. Many thanks also go to the organizing committee, the international advisory board, the technical review committee (who did their job with very short deadlines), and all the participants who made the conference a huge success.
